NATIONAL PARKS

Ras abu Galum

Abu Galum is a protected area north of Dahab. The Bedouin village of Ras Abu Galum is a beautiful, quiet spot for snorkelling and relaxing.

After leaving Alaska Camp, you travel by jeep to the Blue Hole. You then have the option of hiking the 1.5 hours to Ras Abu Galum or riding on a camel. On arrival to Abu Galum, you will be greeted with a welcome drink in one of the Bedouin houses, before taking time to enjoy the scenery and snorkelling that Ras Abu Galum has to offer.

You then hike or take the camel back to the Blue Hole and arrive back in Dahab around 5pm. There is also the option of staying overnight – sleep under the stars and watch the bioluminescence and the phosphorian fish (like lights dancing in the sea).

Blue Hole

The most famous diving and snorkelling spot in Dahab has to be the Blue Hole, situated 10 km north of the city centre.

The Blue Hole was created by the separation of the two continental plates of the East African Great Rift Valley. With a diameter of 100 metres and a depth of +200 metres, The Blue Hole is great for snorkelling, diving and freediving alike. At 55-60 metres you will find the famous archway, which leads to the open sea. Not to be attempted by anyone other than the most experienced

technical divers!!!

Due to its location, The Blue Hole is sheltered in a small bay and doesn't suffer much from the windy weather conditions. Visibility remains clear under almost all weather conditions. Access to the water is made easy by walkway from the shore. This very popular site can be visited by jeep within 30 minutes of Dahab city centre.

Ras Mohammed

Several dive sites Ras Mohammed has earned itself a reputation as one of the top dive and snorkelling sites in the world. Here, at the tip of the Sinai where the Gulf of Suez and the Gulf of Aqaba meet, an ecosystem has been created like no other. The wall diving here is some of the best in the world.

Daily Tours are available either by bus or boat. (approx. 2 hours drive).
